In order to choose the right owner's guide for your heater you need to know the model and type of your heater. If you don't know the Model and Type of Your Heaters, please see the instructions below on how to identify your heater. On the front of most heaters will be a model of the heater name; i.e. Omni 105 (or O-105) and Shining 40 (or R-40). On the back of most heaters are these numbers. The last letter of the entire serial number is the type of model; i.e. O-105 (n) and P-40 (d). We've put together a list of links to manuals for several popular kerosene heaters. This list is by no means all-inclusive, and if you don't find the guide you're looking for, please consult with the kerosene heater manufacturers on the site or call them. First, choose a kerosene heater manufacturer.
